

PSA blames corrupt municipalities for unemployment rate

Capricorn FM - 30 Oct 2019

PSA blames corrupt municipalities for unemployment rate By Mukondeleli Muthambi The Public Servants Association (PSA) in Limpopo says municipalities and government departments in Limpopo are corrupt, thus not being able to fulfil their mandate, especially job creation. This after Statistics SA's quarterly labour force survey for the third quarter showed that Limpopo's unemployment rate has gone up by 2.5% with 21 000 jobs lost in just a space of 3 months. PSA's Limpopo manager John Teffo says the statistics do not come as a surprise because of mismanagement of funds, but adds that the province's economy can be revived if serious consequence management is put in place. Teffo says stakeholders must commit to a greater plan to deal with economic recovery in Limpopo. [Audio: John Teffo] <http://www.capricornfm.co.za/wp-content/uploads/2019/10/TEFFO-PSA.wav>
