Update: Office closure - Moretele Complex

The PSA called for urgent intervention by the Administrator of Public Works to ensure that employees at the Moretele Complex return to their respective workstations.

The PSA learned that the contractor assigned to do work at the Moretele Complex in Mahikeng was not paid for services provided, and subsequently closed the complex, preventing employees from entering their workplace. An urgent letter was submitted to the Administrator to intervene in this matter, and to ensure that workers return to their workstations.

The PSA expects the Administrator to give this matter the required attention as it is the employer's responsibility to ensure that service providers are paid on time.

Members will be informed of developments.
