## PSA concerned about members affected by floods in Nelson Mandela Bay

The recent floods in the Kariega area of Nelson Mandela Bay have caused significant distress and disruption. During visits to various institutions the impact on several departmental buildings and the homes of members was witnessed.

### Impact on members

The PSA is saddened by the extent of the damage caused by the torrential rains. Many members' homes have been severely affected, leading to some employees taking annual leave to manage the cleanup. Thankfully, the PSA has received no reports of fatalities among members' families.

### PSA's call to action

Given the circumstances, the PSA made an official request to the Premier of the Eastern Cape to grant time off to workers affected by this natural disaster. This measure will provide much-needed relief and support to members during this challenging time.

### Safety precautions

The PSA advises members to exercise extreme caution in the coming days. Do not drive or attempt to cross rivers if heavy rain is forecasted, as weather reports indicate that more rain is expected. Your safety is paramount.

### Reporting security issues

Please report any security-related issues at your institutions to the PSA for immediate action. The PSA is here to support and ensure your well-being. If in need of assistance, please contact Mxolisi Nyandu on 082 880 8968.

Members will be informed of developments.
